

the 1990s, the number of people in the world who are under 15 years of age has increased by 1.2 billion, from 1.1 billion in 1980 to 2.3 billion in 1999. The number of people aged 15 years and over has increased by 1.1 billion, from 1.1 billion in 1980 to 2.2 billion in 1999.

There are a number of reasons why the number of people in the world has increased so rapidly. One of the main reasons is that the number of people who are under 15 years of age has increased so rapidly. This is due to a number of factors, including a high birth rate, a low death rate, and a high life expectancy.

Another reason why the number of people in the world has increased so rapidly is that the number of people aged 15 years and over has increased so rapidly. This is due to a number of factors, including a high birth rate, a low death rate, and a high life expectancy.

The number of people in the world has increased so rapidly that it is now estimated that there will be 6 billion people in the world by the year 2025. This is a significant increase from the 5 billion people in the world in 1980.

The rapid increase in the number of people in the world has a number of implications. One of the main implications is that it will place a significant strain on the world's resources. This is because the world's resources are finite, and the number of people who are using them is increasing so rapidly.

Another implication of the rapid increase in the number of people in the world is that it will lead to a significant increase in the number of people who are living in poverty. This is because the world's resources are being used up so rapidly that there will not be enough left to go around.

The rapid increase in the number of people in the world is a major challenge for the world's leaders. They must find ways to manage the world's resources so that there is enough left to go around for everyone. They must also find ways to help the people who are living in poverty.

The rapid increase in the number of people in the world is a major challenge for the world's leaders. They must find ways to manage the world's resources so that there is enough left to go around for everyone. They must also find ways to help the people who are living in poverty.
